CHAPTER FOUR

RESULTS

Table 4.1 This table shows summary of demographics: mean age 23.9years, female 57.7%, male 42.3%, Sample size (n = 600), and sleep duration (in hours) among Basic Medical Sciences Students Sa'adu Zungur University Bauchi. Majority of students (64%) sleep less than 7 hours' while a substantial proportion (36%) sleep 7 hours or more.

Variables	Frequency	Mean (Standard deviation)
Age (Years)		23.9 (2.25)
Male	244 (42.33%)	
Female	356 (57.67%)	
Sleep (hours)		6.37 (1.89)
Sleep Duration:		
< 7 hours	384 (64%)	
>= 7 hours	216 (36%)	

Sleep Duration of Basic Medical Sciences Students at Sa'adu Zungur University Bauchi

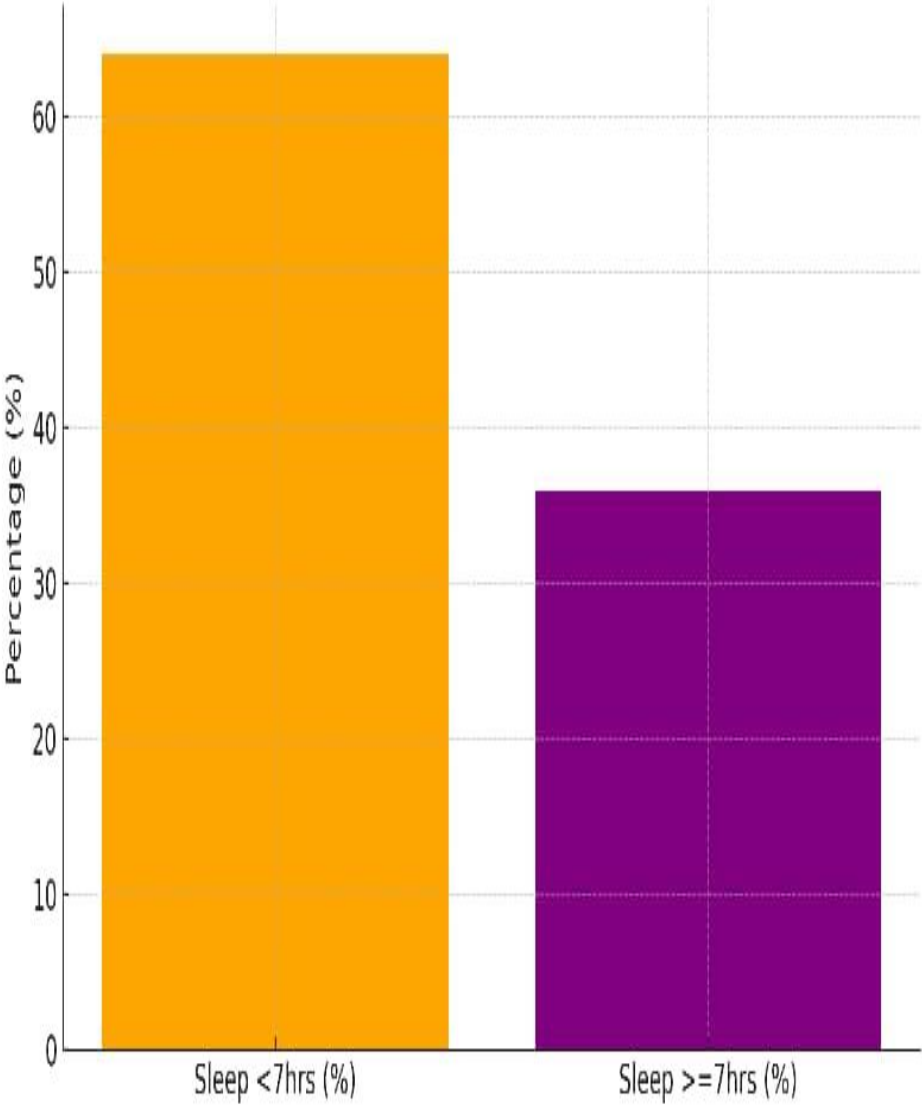

Table 4. 2 This table present level of Academic Performance of Basic Medical Sciences Students. Majority of students (64.5%) demonstrated Good Performance. A significant proportion (35%) achieved Excellent Performance. However, a very small percentage (0.5%) exhibited Moderate Performance.

Academic Performance Categories	Frequency (%)
Good Performance	387 (64.5%)
Excellent Performance	210 (34.94%)
Moderate Performance	3 (0.5%)

Academic Performance of Basic Medical Sciences Students at Sa'adu Zungur University Bauchi

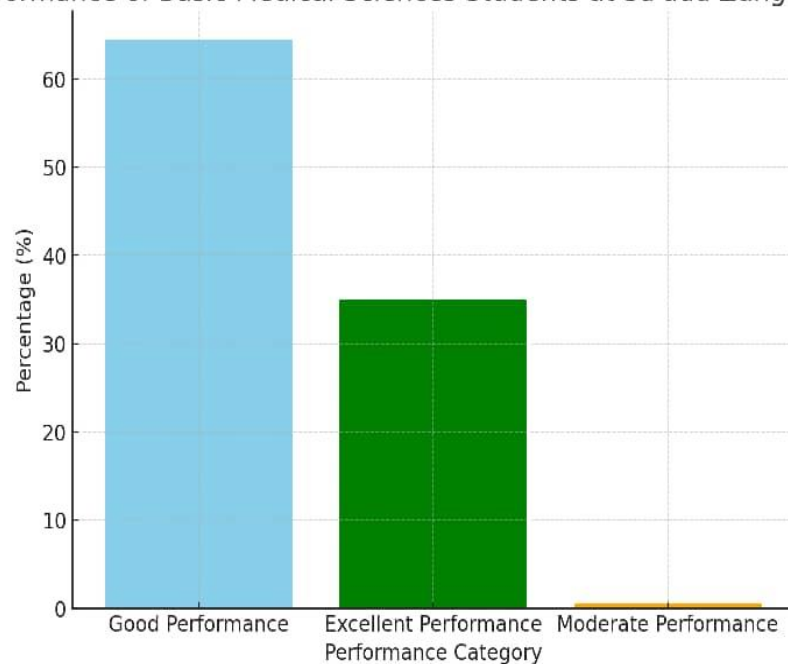

Table 4. 3 This table shows the correlation between Academic Performance and sleep duration among the 600 participants from the students of Basic Medical Sciences Sa'adu Zungur University Bauchi. The correlation between Academic Performance and sleep duration is statistically significant ($p < 0.0033$), with a weak positive correlation ($r = 0.23$).

Academic Performance and Sleep Duration	r	p
	0.23	0.0006
